

# Whirly Windmill

**1.** Cut out the pieces along the red lines and fold along the blue dotted lines.

**2.** Slide the tabs at the top of the walls through the roof slots and tape.

**3.** Cut a piece of straw 3cm long and push it through the sail, then through the front of the windmill.

**4.** To finish, slot the two pieces of the weather vane together. Slide it into the roof and tape.

**Idea** Glue lolly sticks to the sails to make them look real.

Make a **Whirly Windmill**
